Melbourne, VIC, Australia | 0481967502 | thakkarmeet339@gmail.com | [github](#) | [linkedin](#)

SUMMARY

Master of Information Technology student at RMIT University with hands-on experience in full-stack development, backend APIs, responsive web applications, database systems, and cloud technologies. Skilled in JavaScript, Java, Python, Node.js, REST APIs, AWS, Git, Linux, SQL, PostgreSQL, MongoDB, HTML, CSS, Angular, Flutter, and Firebase. Experienced in building API-driven platforms, customer-facing digital products, and maintainable software solutions, with strong problem-solving, stakeholder collaboration, documentation, and continuous learning skills.

EDUCATION

Master of Information Technology | RMIT University, Melbourne, Australia | GPA: 2.92/4.00 **Dec 2025**
Bachelor of Technology in Information Technology | CHARUST, India | GPA: 8.78/10.00 **May 2023**

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, C, C++, R, HTML, CSS, PHP, SQL, MySQL, MATLAB
Backend, APIs and Frameworks: Node.js, Django, REST APIs, API integration, database-backed applications
Frontend and Mobile: Angular, Flutter, Firebase, responsive web design, HTML5, CSS3, AJAX
Cloud and Tools: AWS, EC2, Lambda, CloudWatch, S3, RDS, Docker, Kubernetes, Jenkins, CI/CD, Git, Linux
Databases and AI: PostgreSQL, MongoDB, MySQL, data modelling, Machine Learning, NLP, BERT, RegTech

PROFESSIONAL EXPERIENCE

Software Engineer - Digital Asset Custody Solutions (DACS) **July 2025 - Nov 2025**
RMIT Work Integrated Learning Program, Melbourne, Australia

- Built a high-volume cryptocurrency price database system processing 100,000+ data points daily across USD and AUD to support regulatory compliance for ATO, IRS, HMRC, and OECD requirements.
- Engineered RESTful APIs to automate price aggregation from Binance, Kraken, and CoinGecko, improving system communication and reducing manual data collection effort.
- Designed database infrastructure with complete audit trails to support data accuracy, regulatory attestation, reporting reliability, and future scalability.
- Collaborated with business stakeholders to translate complex regulatory requirements into technical solutions, delivering a production-ready system with documentation for global deployment.

Web Developer - Crown Software, Junagadh, India **Jan 2023 - May 2023**

- Led development of the MD Hostel Management System from concept to deployment, digitising operations for 500+ students and staff across room allocation, fee tracking, and attendance monitoring.
- Developed full-stack web application features to replace manual administrative workflows with a structured, database-backed digital system.
- Improved application performance using AJAX, creating a smoother UX and reducing page load friction for end users.
- Mentored a 4-person development team on Git workflow and code quality standards while refactoring 5,000+ lines of legacy code to improve maintainability and reliability.

Flutter Developer - Indegeneous, Surat, India **May 2022 - June 2022**

- Built the complete frontend for a medicine reminder application used by 200+ beta testers, translating client requirements into functional mobile app features.
- Developed consistent user-facing interfaces across 15+ app screens using standardised layouts, reusable components, and clear design patterns.
- Integrated Firebase and documented the application architecture to support future development and easier maintenance.

Web Developer - Simulas, Ahmedabad, India **June 2021 - Aug 2021**

- Developed the EZYINN hotel management system for 10+ properties, supporting booking, inventory, and billing workflows through a web-based platform.
- Built responsive user interfaces using HTML5, CSS3, and JavaScript, improving cross-browser compatibility and front-end usability.
- Supported 8+ concurrent client projects, maintaining delivery timelines through communication, progress tracking, and attention to detail.

KEY PROJECTS

BERT NLP Research **July 2022 - Nov 2022**

Researched transformer models including BERT, GPT-3, BART, and XLNet; implemented sentiment analysis models and produced a technical report on attention mechanisms, model comparison, and AI use cases.

Customer Segmentation **Jan 2022 - May 2022**

Built an ML pipeline segmenting 10,000+ customer records using K-means clustering, identifying key behavioural characteristics to support targeted marketing strategies.
